### VENETIAN BLINDS

#### VENETIAN BLIND OPERATION

- Before raising the blinds, always ensure that the slats are tilted fully open and, where fitted, the bottom rail hold down brackets are released. When opening the window behind the blind, always raise the blind first. Pushing your hand through the slats will cause unnecessary wear and tear on your blind.
- To clean the slats we recommend the use of a clean antistatic duster or cloth.
- For stubborn stains and grease we recommend you wash your blind with a mild detergent, thoroughly rinse with clean water. Dry thoroughly before re-hanging.
- DO NOT use harsh abrasive or solvent based chemicals as these cause irreparable damage to your blind.
