

CABRERA

TERRACE AWNING

by  TURNILS®

Cabrera is a fully cassetted folding arm awning in a beautiful design. The cassette securely protects the fabric from both dirt and moisture.

The heavy-duty folding arms, using Dyneema® connections provide superior strength and durability, while the powerful springs ensure

excellent fabric tension. Cabrera has a modern design and look that will adorn any home or commercial building.

Operation

External operation with crank as standard or an optional motor control for both external and internal operation. The motor can include automatic controls such as remote control or sun and wind sensors.

Installation

The Awning is easily installed directly onto the wall.

Folding Arms

Heavy-duty folding arms equipped with Dyneema® connections for superior strength and durability. Heavy-duty springs provide excellent fabric tension.

Components

The selection materials and components used are anti-corrosive and highly durable.

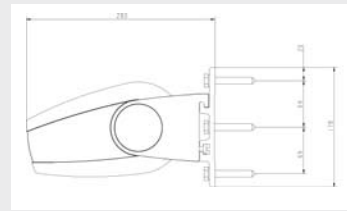

Decoration

The decoration kit, which includes covers for the end caps and a strip that fits into the front profile, is available in three colours: Silver, White and Graphite.

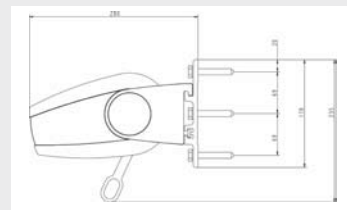

Dimensions

Projection: 2.0, 2.5, 3.0, 3.5m
