AWNINGS

# DROP ARM AWNINGS

Fashionline drop arm fabric awnings are an ideal solution for shading windows, especially in those hard to access places. Drop arm awnings pivot in an arc, extending and retracting the fabric skin, providing protection for your whole window.

The benefits come from the larger area between the awning and window, enabling greater air circulation while still allowing wind-out and casement windows to open.

Drop arm awnings can be installed in tricky applications where others can't, due to the range of operation options including external crank operation, internal winch operation and motorisation.

## Energy benefits

A significant difference can be made by preventing heat from entering your home through the windows. This can mean substantial cuts to your energy costs and improving the comfort of your living areas. Outside blinds and awnings can reflect up to 70% of heat before it reaches the window and can be rolled up during the winter to allow winter sun to naturally warm your home.

Elegant Fashionline outside blinds are an excellent solution to reducing the total heat load to your home, resulting in more comfortable temperatures during the day and protecting your valuable carpet and furnishings from the fading effects of

Fashionline is the brand of an Australian-wide association of blind makers who provide window furnishing solutions with the latest designs, colours and technology at affordable prices.

Your local Fashionline dealer brings to your home unique window furnishing concepts created by the combined resources of the largest independent blind manufacturing co-operative in Australia.
