Outdoor Lifestyle

Awnings and shading systems have become an integral component of the Australasian lifestyle.

Whether you are entertaining with friends or simply seeking protection from the heat and glare of our long hot summers, awnings, sunscreens and external venetian blinds provide the perfect solution.

While many colours, fabrics, finishes and sizes ensure that your new awning, sunscreen or external venetian blind will look great they can also help to reduce energy consumption and your home's carbon footprint.

A Somfy automation system puts you in control and provides a much-desired flexibility that is simply not available with a manual system.

The benefits of a Somfy automated awning, sunscreen or external venetian blind include:

Greater Convenience

Enjoy the Somfy experience! You can create the ambience to match your setting with the simple push of a button. No more hard to manage crank handles or ropes and pulleys to get jammed.

Longer Lifespan

The smooth operation of Somfy's motors means your awnings, sunscreens and external venetian blinds are never mistreated. You can even use a Somfy wind sensor to help protect them from damage caused by strong wind.

Energy Efficiency

Automated awnings, sunscreens and external venetian blinds can all help to reduce your energy costs. In summer they can maximise shade and sun protection to keep you cool but then in winter let the sun come in for natural warmth and light!

Quiet and Discreet

Somfy's world leading motors are hidden away inside your awning, sunscreen or external venetian blind. There are no bulky boxes and all you will see are the stylish and easy to use Somfy controls.

Automated Cassette Style Awning

Remote Controls

Our remote controls have been designed with flair and come in a range of colours to suit every décor!

Somfy remotes also come with a convenient and discreet wall mount, meaning you will always be able to find your remote when you want it.

Somfy RTS motors all feature a favourite position, allowing you to easily stop your awnings, sunscreens and external venetian blinds in the same position time after time. Setting your favourite position is easy and once done simply press the 'MY' button on your Somfy remote control.

With a range of 200 metres in open space, or around 20 metres through two reinforced concrete walls, you can operate your Somfy motor from anywhere in the home.

For your convenience Somfy Telis remotes come with either 1 or 4 channels and for ultimate control the Telis Composio and Impresario with 20 channels and an easy to use LCD screen. There's even a Telis Modulis with its revolutionary scrolling thumbwheel to easily adjust the slats on your external venetian blind.

Telis Patio has been specifically designed for external awnings and sunscreens. The weatherproof and shockproof qualities of the Telis Patio make it ideal for outdoor use.

Sensors

With Somfy's innovative range of sensors you can reduce the carbon footprint of your home.

Our sun sensors will extend your awning, or close your sunscreens or external venetian blinds when the sun reaches a pre-set intensity. As soon as the sun disappears, the awning retracts and everything opens. It's automatic shade for your home!!

Somfy's wind sensors protect the products that protect you! When the wind reaches a pre determined strength, the sensor will retract your awning, sunscreen or external venetian blind to help protect it from damage.

Eolis 3D WireFree RTS

With no wires to connect this innovative sensor is compact and unobtrusive. Reacting to the movement of the Awning's front bar the functionality of the Eolis 3D WireFree RTS has been extensively laboratory and wind tunnel tested.

Sunis WireFree RTS

Using an inbuilt solar cell the Sunis WireFree RTS is installed without any wiring. Teamed with a Telis Soliris remote control it gives you total control over the sun.

Eolis and Soliris Sensors

Somfy's range of sensors includes the Eolis wind and Soliris sun and wind sensors. Both are available in a Wired Technology or RTS solution and are ideally suited to sunscreens and external venetian blinds.

Receivers

Did you know that Somfy also makes RTS receivers to control lights and even heaters too?! There is even a dimmer version allowing you to modulate the intensity of your lights using the up and down buttons of your Telis remote control.

Home Automation Systems

Somfy Remote Controls and Sensors can be easily linked to your Home Automation System.

For details consult your Somfy retailer who can advise on the best solution for you.

Warranty

Somfy Products are synonymous with innovation, excellent quality, safety and durability. Each product is extensively tested to ensure it conforms with national and international standards before it leaves the factory. All Somfy motors, controls and sensors carry a 5 year warranty.
